# Heavy Duty Features

- **SEMI-AUTOMATIC PARAMETER DATA ENTRY**  
Electronic measuring arm automatically enters offset and rim diameter, resulting in less chance for operator error.
- **PATENTED BTS™ (BEHIND THE SPOKE) HIDDEN WEIGHT PLACEMENT**  
Automatically splits weights to hide tape weights behind the spokes on custom/specialty wheels.
- **INFINITE PLANE WEIGHT PLACEMENT CAPABILITY**  
Relative positioning of weights on both planes determined by wheel design requirement, not by fixed computer program.
- **DOUBLE TOP-DEAD-CENTER BRAKING**  
Wheel automatically brakes at correct weight placement locations in both planes for easier, more accurate weight placements.
- **HEAVY-DUTY SPEED NUT**  
Provides faster and easier mounting.
- **OTHER TOP-OF-THE-LINE FEATURES**  
On Board Information System  
Operator Self-Calibration  
Multiple Wheel Parameter Memory (4)  
5 ALU Modes for Custom Wheels  
Easy to Read and Reach Raised Display Panel  
Built-in Weights/Cones & Pliers Storage  
Match Balancing

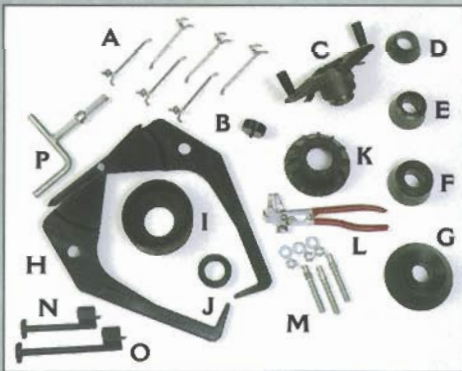

# Compare the Value with Other Heavy Duty Balancers
