

SWA 2290

DIAGNOSTIC WHEEL ALIGNER

EASY TO USE, FAST TO SETUP AND MORE FLEXIBILITY FOR YOUR SHOP

DIAGNOSTIC WHEEL ALIGNER SYSTEM SWA 2290

An advanced imaging alignment system doesn't have to be complicated. The SWA 2290 was designed with technicians in mind to provide the core features you need for a perfect wheel alignment. Its advanced technology, combined with the simplest and most intuitive software, gives you all the tools to take your alignment business in the right direction.

NOTIFICATION SYSTEM

STAY ON TRACK THROUGH EACH STEP

We call it "Compensate-Warn-Alert" but all you need to know is that the **system will compensate** almost any error made during the alignment. Whether it's due to suspension stress or loose components, the SWA 2290 will quickly find and correct errors as they are made. If the system is unable to fix an error, the technician will be notified with the right instructions to fix it.

AUTOMATIC TRACKING CAMERA BEAM

Cameras move automatically up and down following the targets so technicians don't have to spend time on adjusting the height of the camera beam.

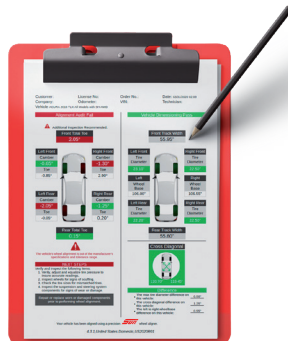

AUDIT CHECK - SELL MORE ALIGNMENTS

We can help you explain what additional repairs are needed. With features like Audit Check, you can uncover alignment problems and pick up extra services with easy-to-read printouts in under a minute.

Automatic alignment measurement print-out includes.

- Measurement of track width
- Front and rear toe
- Camber
- Wheelbase
- Rolling radius
- Cross diagonal

INTELLIGENT WORKFLOW

Intelligent & predictive alignment workflow for your selected vehicle without unnecessary steps. All the other features are always just one click away.
