

GENERAL REPAIR WHEEL ALIGNMENT

*geoliner*<sup>®</sup>  
WHEEL ALIGNMENT SYSTEMS

*320*

*LIFT MOUNTING KITS*

**HOFMANN**<sup>®</sup> 

Mounting hardware\* adapts to common alignment lifts and is easily removed with Quick Release System.

Small footprint makes the most of any available space, bringing advanced, intuitive alignment services to shops of every size.

\*Mounting hardware sold separately.

The geoliner® 320 utilizes two reference pods in front of the vehicle during the alignment process for improved accuracy and repeatability. To best fit the needs of your shop, Hofmann® offers several different mounting kits specifically made for your unique needs.

### UNIVERSAL LIFT MOUNT KIT [EAK0334J36C]

The Universal Lift Mount Kit can be installed/removed on nearly all alignment lifts requiring no modification or special preparation.

### SIDE MOUNT LIFT KIT [EAK0334J60C]

The Side Mount Lift Kit provides a robust, heavy-duty camera mounting solution for common alignment lifts through the use of a low-profile, permanent mounting system.

### FLOOR MOUNT KIT [EAK0334J61A]

The Floor Mount Kit provides a safe, molded platform for off-lift and pit applications.

### QUICK RELEASE SYSTEM

Included with both the universal and side mount kits, the Quick Release System allows easy mounting/removal of the reference pods for safe storage. The Quick Release System is interchangeable between mounting kits allowing the geoliner® 320 to be used on multiple lifts.
