JOHN BEAN® SCISSOR ALIGNMENT LIFT SYSTEMS PROVIDE UNMATCHED PRODUCTIVITY, PERFORMANCE AND VALUE.

John Bean scissor alignment lift systems are easy to operate, provide increased accessibility to alignment adjustment areas and are easy to load. Space saving design allows for up to five scissor lifts to fit into the same operating space as four 4-post lifts. Lock & Lighted models provide enhanced performance allowing the technician to perform critical tasks while minimizing alignment process operations, by illuminating both inspection and adjustment areas and by sequencing the locking of alignment plates.

KEY FEATURES

LOCK & LIGHTED MODEL FEATURES
- True Task™ Lighting System - optimized positioning of rear light bars increase the viewing angle and illuminate the widest range of vehicle track widths
- Front lights are mounted into the base of the turnplate and accommodate vehicles of varying wheel track widths
- Turnplates and slip plates that can be pneumatically locked/unlocked from the operator console
- When unlocked, the front and rear plates have full movement in all directions to ensure that proper alignment inspection and adjustment may be performed

WIDE 26” RUNWAYS
- Long and wide runways allow for alignment service on a wide range of vehicle widths and wheelbases

SLIP PLATES
- Durable, maintenance reduced 72” slip plates glide on over-sized bearings, providing the range of motion needed to apply rear alignment corrections

INTEGRATED AIR KIT
- Center runway mounted outlet allows clear access for operator to roller jacks

APPROACH RAMPS
- End sliders prevent damage to floors and are quieter than conventional metal rollers

MULTI-SAFETY SYSTEM
- Includes large twin-interlocking air-actuated safety locks featuring up to 18 level and locked positions and pressure sensing flow control valves
