

WHEEL ALIGNMENT SYSTEMS

UNCOVER ALIGNMENT PROBLEMS IN LESS THAN 60 SECONDS.

Create a huge uptick in your alignment business.

INTRODUCING THE **V3450** WHEEL ALIGNMENT
AUDIT SYSTEM

JohnBean

THE V3450 WHEEL ALIGNMENT AUDIT SYSTEM.

DETECT MORE ALIGNMENT PROBLEMS. UNCOVER MORE REVENUE.

With a wireless, compact design and easy-to-read printouts in under a minute, the V3450 can increase your alignment revenue by 30% or more. Plus, its mobility and simple operation mean you don't need an alignment technician or a lift to run accurate audits.

SECURE CLAMPING WITHOUT TOUCHING THE WHEEL.

Clamping with a single fast-action adjustment knob, the V3450's, AC400 wheel clamps only make contact with the tire. The clutch limited clamping force provides accurate and repeatable results. Plus, its durable, lightweight magnesium construction and large, comfortable handle prevent user fatigue and make it easy for anyone to operate—in or outside your bays. It also prints alignment reports automatically, which you can share with customers. Considering the added alignment jobs it can create, the V3450 pays for itself in no time.

AUDIT MEASUREMENTS

- Track Width
- Front and Rear Total Toe
- Camber
- Wheelbase
- Cross-Diagonal
- Rolling Radius

FEATURES

- Wireless Design Eliminates Connections and Eases Mobility
- Continuous Third Camera Calibration Provides Accurate Readings and Results
- Pull Through Design for Easy Installation in Service Drives
- VIN Reader
