

WHEEL ALIGNMENT SYSTEMS

FINDING YOUR WAY AROUND ANY ALIGNMENT PROBLEM
JUST GOT SIMPLER.

Take your alignment business in a better direction.

INTRODUCING THE **V2200** IMAGING WHEEL
ALIGNMENT SYSTEM

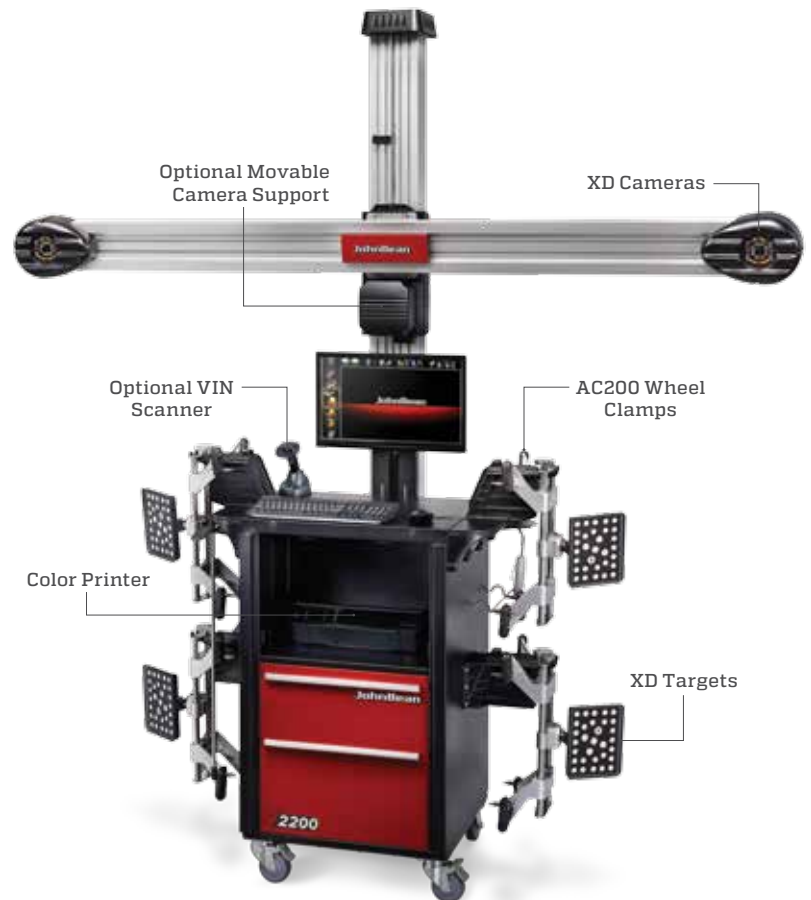

JohnBean

THE V2200 IMAGING WHEEL ALIGNMENT SYSTEM. WHERE HIGH TECHNOLOGY AND SIMPLICITY CONVERGE.

Now there's an imaging alignment system that's sophisticated, yet doesn't require lots of training or experience to operate. With the latest XD target and camera system, the V2200 features advanced technology, combined with the simplest, most intuitive software we've ever offered providing the essential tools for any alignment tech. It's the best of both worlds.

HIGH END PERFORMANCE AT AN ENTRY-LEVEL PRICE.

The advanced XD target and camera system provides consistent accuracy and smaller, lighter targets. And the AC200 clamps attach securely to the wheel to provide even greater accuracy. Best of all, the Pro42 software offers an extremely intuitive interface with advanced features that guide technicians through each step of every alignment job, which means they don't have to be alignment specialists to perform like one. The customizable work flow options also let techs program the system to fit your shop's specific needs. North, south, east or west, you just won't find this level of advanced alignment technology on any other entry-level system.

FEATURES

- High Resolution Cameras Produce Accurate, Live Alignment Readings and Diagnostic Data
