## *Snap-on Equipment Introduces 10K 2-Post Combo (Symmetric/Asymmetric) Automotive Lift*

Conway, Ar. - March 25, 2009 - Adding to an already comprehensive lift product offering, John Bean announces the introduction of the most versatile 10K lift in the industry: the Combination Symmetric/Asymmetric, 2-Post lift. This 10,000 lb. capacity lift allows for symmetric or asymmetric lifting to match the manufacturer's recommended pickup points by simply adjusting the three-stage, telescoping front arms.

This unique design accommodates a wider range of vehicles than standard 10K 2-post lifts and features industrial-strength columns and pre-loaded, reinforced lifting arms featuring full-length pin sleeves to boost strength and durability.

Continuing Snap-on Equipment's leadership in lift safety, the Combination 10K, 2-Post lift is ALI/ETL certified to the current, ANSI/ALI ALCTV 2006 specifications, is equipped with bolt-on heavy-duty restraints that engage when the lift is raised and has a single-point, safety lock release allowing for 2-handed lift lowering.

Snap-on Equipment is the world's leading automotive service equipment company and is a division of Snap-on Inc., a leading global innovator, manufacturer and marketer of tools, diagnostic and equipment solutions for professional tool users. Founded in 1920, Snap-on Inc. is a \$2.8 billion S&P 500 Company headquartered in Kenosha, Wisconsin.
