

BFH 800 Wins Top 20 Honors

CONWAY, Ark. (Sept. 10, 2007) — Snap-on Equipment's BFH 800 Premium Wheel Balancer has been named to Motor Magazine's Top 20 Tools list for 2007.

Motor's Top 20 Tools list is compiled annually by the editorial staff at Motor Magazine and recognizes products with features and benefits that offer outstanding productivity.

The BFH 800, a part of Snap-on Equipment's John Bean product line, performs a complete diagnostic check on every balance in less than 10 seconds, the fastest floor-to-floor time in the industry. The fully automated system requires no manual measurements and uses VPI Imaging Balance technology to eliminate productivity loss for shop owners and technicians.

"Motor Magazine is well-recognized and highly respected in this industry, and we are honored to be one of only 20 chosen from hundreds of entries to receive this prestigious award," said Michael Alusick, product manager for Snap-on Equipment's John Bean balancer line. "The BFH 800 is truly innovative in its ability to improve a technician's productivity. This honor validates our commitment to producing products that make work easier for our customers."

Snap-on Equipment is the world's leading automotive equipment company, and is a division of Snap-on Incorporated, a leading global innovator, manufacturer and marketer of tools, diagnostic and equipment solutions for professional tool users. Founded in 1920, Snap-on Inc. is a \$2.4 billion, S&P 500 company headquartered in Kenosha, Wisconsin.
